Fictional proceedings and finding

The taxpayer, aged 45, carries on a trading business. This constructed case assumes a valid old-regime election, with Form 10-IEA filed on 30/07/2024. Income figures are ordinary slab-rate income; no surcharge or special-rate income is assumed.

A scrutiny notice dated 20/08/2024 was served on 21/08/2024. A questionnaire dated 10/08/2026 was served on 11/08/2026. The taxpayer submitted a reply on 25/08/2026. A proposed-variation communication dated 01/09/2026 was answered on 08/09/2026. These are invented events, not portal records.

The taxpayer claimed business expenses of Rs.5,00,000. The reply referred to invoices and bank-paid entries, but the AO concluded that the supporting particulars were insufficient and disallowed the full amount. The taxpayer disputes that conclusion and relies on the reply and illustrative expense ledger in this pack.
